Seven skills kids learn by cooking

Do you remember helping your parents bake cookies or make dinner as a child? Did you realize you were learning skills such as how to count, measure and read recipes? Cooking activities for kids can help them develop confidence and skills naturally in the kitchen. Cooking together also can help your family commit to healthy habits that can last a lifetime. **Here are seven skills that your children can develop while helping in the kitchen:**

1. Explore their senses.
2. Expand their palate.
3. Working in the kitchen provides kids and teens opportunities to gain a sense of accomplishment.
4. Making healthy choices.
5. Responsibility.
6. Sharing good conversation.
7. Basic math, science and language skills. (Excerpt from [Seven skills kids learn by cooking](#))
